CATCH meeting AGORA, June 11th 2010

Julia Vytopil

Project office CATCHPlus

CATCH CONTINUOUS ACCESS TO CULTURAL HERITAGE PLUS

CATCHPlus

- CATCHPlus: building on successful CATCH projects
- Valorisation of research results
- From knowledge and prototype to reliable applications

CATCH

CONTINUOUS ACCESS TO CULTURAL HERITAGE PLUS

facts & figures

- 3 year project (2009-2011)
- partners: 9 heritage institutions, 3 research institutions and ICT industry
- total costs ± 3,2 M€, financed by:
  - project partners
  - Ministry of Education, Culture and Science
  - Ministry of Economic affairs (through PRIMA measure)
  - Netherlands Organisation for Scientific Research

CATCH

CONTINUOUS ACCESS TO CULTURAL HERITAGE PLUS

Expected results

- tools for cultural heritage
- interoperability between institutions and collections
- business models for sustainable collaboration and management of products

CATCH

CONTINUOUS ACCESS TO CULTURAL HERITAGE PLUS

Crucial issues

- generic and open
- tools developed by/for heritage institutions
- tested in at least 1 other institution
- independent commission judges usability and genericity

CATCH

CONTINUOUS ACCESS TO CULTURAL HERITAGE PLUS

Business models

- Deliverable in project description
- During and after project
- Collaboration between industry and institutions
- Maintenance and management of software
- Services based on software

CATCH CONTINUOUS ACCESS TO CULTURAL HERITAGE PLUS

Lessons learned so far

- Building on business model ideas from CATCH
- Bridging results from CATCH to plans in CATCHPlus
- ICT industry wants to be engaged

Overview of CATCHPlus technical results

CATCH meeting Agora, June 11 2010, Julia Vytopil, Hennie Brugman

CATCH

CONTINUOUS ACCESS TO CULTURAL HERITAGE PLUS

Technical coordination connects sub projects by stimulating:

- Tools that interoperate via web services
- Exchange and accessibility of data
  - Formats: SKOS, annotation format, DublinCore
  - Access: OAI-PMH, (REST) web services, Linked Open Data → Vocabulary Repository
- Identify and develop widely usable components
  - Checkers, User Profile Repository
- Persistence of products, including references/links
  - Persistent identifiers
- Efficiency of development: bundle efforts
  - Example: Workspaces

CONTINUOUS ACCESS TO CULTURAL HERITAGE PLUS

Technical coordination connects sub projects by stimulating:

- Products that interoperate via web services
- Exchange and accessibility of data
  - Formats: SKOS, annotation format, DublinCore
  - Access: OAI-PMH, (REST) web services, Linked Open Data → Vocabulary Repository
- Identify and develop widely usable components
  - Checkers, User Profile Repository
- Persistence of products, including references/links
  - Persistent identifiers
- Efficiency of development: bundle efforts
  - Example: Workspaces

  SCRATCH
- Alignment
  STITCHPI
- Art Recom
  CHIP API
- Speech Recognition tools
  Spraakherkenning / Gemeentearchief Rotterdam

Checkers (MITCH and RICH spin offs – Naturalis, RCE)

- Detect named entities in uploaded PDF and HTML texts
- Detect potential errors in (database) table data

User Profile Repository (CHIP spin off - RMA)

- Store and share (semantic) user preferences and ratings in a central repository
- Show and provide ratings for objects on any web page
- Status: technical design is made

CONTINUOUS ACCESS TO CULTURAL HERITAGE PLUS

Vocabulary and Alignment Repository (1)

– Products

All GTAA concepts starting with “cul”

http://catchplus.tuxic.nl:18080/vas/api/find/concept?format=xml&query=^cul&match_kind=regex&limit=100&format=xml&cs=http%3A%2F%2Fwww.beeldengeluid.nl%2FThesaurus%2FOnderwerpen&sort=match_label&match_language=nl

- GUI – generic thesaurus browsing and searching web application

CATCH CONTINUOUS ACCESS TO CULTURAL HERITAGE PLUS

Vocabulary and Alignment Repository (2)

- Applications
  - Primarily for CATCHPlus sub projects
  - Beeld en Geluid and National Archive collaboration
    - Pictura uses the API from their Memorix software
  - Interest expressed by CLARIN-NL, Werkgroep Erfgoedthesauri, RKD, Adlib etc.

CATCH

CONTINUOUS ACCESS TO CULTURAL HERITAGE PLUS

Vocabulary and Alignment Repository (3)

- Future
  - Distributed operation
  - “live” connection to thesaurus source databases
  - Link to DEN thesaurus overview, both ways

CATCH

CONTINUOUS ACCESS TO CULTURAL HERITAGE PLUS

Persistent identifiers (1)

– Products

- Requirements analysis and technology overview (see www.catchplus.nl)
- Basic choice: Handle technology
- Implementation:
  - One “Local Handle System” per participating organisation → you own your own ‘domain’
  - REST web service for identifier management
    - » From context of collection management system
    - » From context of metadata publishing

CATCH CONTINUOUS ACCESS TO CULTURAL HERITAGE PLUS

Persistent identifiers (2)

- Pilot projects/applications
  - Beeld en Geluid
  - Interested: Naturalis, RCE
  - National Archive uses Handles for NA4All
- Organisational
  - EPIC consortium (SARA, MPG/GWDG, CSC) provides sustainable hosting and services

CATCH

CONTINUOUS ACCESS TO CULTURAL HERITAGE PLUS

Metadata standards and harvesting

- Support introduction of OAI-PMH “data providers” for standardised publication of metadata for harvesting
  - DublinCore
  - Qualified DublinCore
  - Proprietary formats
- Beeld en Geluid, KB, RMA, Naturalis
- First application: Nederlands Erfgoed: Digitaal!
  - Harvests to central index

CATCH

CONTINUOUS ACCESS TO CULTURAL HERITAGE PLUS

Workspaces and annotations

- Workspaces
  - Shared solution for login, uploading resources, add metadata, bundle resources
  - This functionality is part of most CATCHPlus sub projects
  - Search, browse, annotate
  - Launch web services on workspace content
  - Possibly collaboration with BigGrid, CLARIN-NL and LifeWatch
- Annotations:
  - Exchange format
  - Repository for storing, searching and browsing annotations

CATCH

CONTINUOUS ACCESS TO CULTURAL HERITAGE PLUS

Conclusions

- Vocabulary Repository and Persistent Identifier services are working and attracting substantial interest
- Common services can save sub projects (and others) work
- Common services stimulate standardisation and integration
- Common services contribute to digital cultural heritage infrastructure
- One year on the way: conditions not always easy, but products are showing up
